CLAX®

Revoflow Deosoft 54X1 Breeze

Fabric Softener – long lasting and odour counter-acting

Description

Clax® Revoflow Deosoft Breeze 54X1 is a highly concentrated fabric softener with malodour elimination technology specially formulated for on-premise laundries. Suitable for the Clax® Revoflow system.

Features

Clax® Revoflow Deosoft Breeze 54X1 is a highly concentrated fabric conditioner based on biodegradable cationics. In the wash solution the positively charged cationics adsorb to the negatively charged surface of the fabric thus creating a lubrication effect for the fabric. During the drying process this prevents clogging and build-up of static electricity. Clax® Revoflow Deosoft Breeze 54X1 contains a modern long lasting perfume which provides extra freshness to the fabric. The product is also equipped with odour neutralization technology. This technology reacts with urine type malodours which are sometimes present on the fabric even after a washing process. It does not mask the malodour but eliminates the molecules that carry the malodour.

Clax® Revoflow Deosoft Breeze 54X1 can be used for most types of fabrics, but is particularly effective on bulked or textured fabrics such as towels. It also imparts a smooth, silky feel on woven or flat knitted fabric conditions.

Benefits

- Excellent softening of fabrics (towels, sheets, wool, delicates etc.)
- Highly concentrated formulation minimises the impact on environment
- Prevents build-up of static electricity on synthetic fabric
- Delivers a pleasant residual smell
- Contains Odour Neutralisation Technology which effectively eliminates malodours

Application areas

- Healthcare
- Lodging
- Government
