# Clax® Revoflow Deosoft Breeze 54X1

Fabric Softener – long lasting and odour counter-acting

Clax Revoflow DEOSOFT BREEZE 54X1 is a highly concentrated fabric softener with malodour elimination technology specially formulated for on-premise laundries. Suitable for the Clax Revoflow system.

## Key Properties

Clax Revoflow DEOSOFT BREEZE 54X1 is a highly concentrated fabric conditioner based on biodegradable cationics. In the wash solution the positively charged cationics adsorb to the negatively charged surface of the fabric thus creating a lubrication effect for the fabric. During the drying process this prevents clogging and build-up of static electricity. Clax Revoflow DEOSOFT BREEZE 54X1 contains a modern long lasting perfume which provides extra freshness to the fabric. The product is also equipped with odour neutralization technology. This technology reacts with urine type malodours which are sometimes present on the fabric even after a washing process. It does not mask the malodour but eliminates the molecules that carry the malodour.

Clax Revoflow DEOSOFT BREEZE 54X1 can be used for most types of fabrics, but is particularly effective on bulked or textured fabrics such as towels. It also imparts a smooth, silky feel on woven or flat knitted fabric conditions.

## Designed For

- ▶ Healthcare
- ▶ Lodging
- ▶ Government

### Benefits

- ▶ Excellent softening of fabrics (towels, sheets, wool, delicates etc)
- ▶ Highly concentrated formulation minimises the impact on environment
- ▶ Prevents build-up of static electricity on synthetic fabric
- ▶ Delivers a pleasant residual smell
- ▶ Contains Odour Neutralization Technology which effectively eliminates malodours

### Directions for Use

1. Dose using Clax Revoflow dosing system.
2. Dose into the last rinse of washer extractor or in the last section of a continuous batch washer.

Dosage recommendation: 0.2 – 1 ml/kg dry goods.

Please note that this product should not be used on articles made of micro polyester fibres such as cleanroom garments, water repellent theatre linen or cleaning microfibre cloths/mops.

### Technical Data

Description	
<b>Appearance</b>	Green low viscous liquid
<b>Relative density</b>	1.01
<b>pH (neat)</b>	3.0
