INTRODUCING

 **JayWare**

When providing innovative warewashing solutions for our clients, we know how.

We know your primary concerns are performance, energy efficiency, sustainability and stylish design, so we focus on sourcing machinery that expertly blends all three. Our aim is to provide only the highest-quality, most advanced solutions with flexible payment options, structured in a way that suits you best. Whether you're running a small café, a 5-star hotel or full-scale commercial kitchen, we can help. We know how.

How we approach the art of warewashing

JayWare by Richard Jay delivers fresh and innovative warewashing solutions from Australia's trusted name in commercial laundry. At Richard Jay, our high-quality warewashing machines are designed and manufactured in Italy to the exacting standards European appliances are renowned for throughout the world. We select machines based on energy and water-efficiency as well as performance to deliver premium results.

From the latest and greatest machines that wash as well as store your wares to simple glass-washing machines that provide sparkling, hygienic results in a flash, Richard Jay provides the best of everything. This includes flexible solutions to make budgeting easy.

Get in touch with your nearest JayWare by Richard Jay expert and fill them in about the nature of your business, what you're washing, how much you're washing and what your top priorities are.

WHICH WAREWASHER IS RIGHT FOR YOU?

Introducing a selection of our most popular models.

01 – The Undercounter Warewashing Aqua 50 MONO

This undercounter warewashing model is a dual glass and dishwasher ideal for pubs, bars and restaurants.

The sound-proof and heat-proof machine operates quietly and goes about its business efficiently, delivering a flawless, hygienic clean at an affordable price. It features a wide loading capacity, a double-skin door with security microswitch and a deep-drawn and inclined tank for complete draining every time.

Key features

- Thermostop system: the rinse starts only when the water is at 85°C
- Anti-dropping roof to safeguard the hygiene of freshly washed dishes
- Light wash and rinse arms to ensure total efficiency when water pressure is low
- Available as Single Phase "Plug in and Play"

 320H / 750hr

 345H / 450hr

02 – The Undercounter Premium 50

Expect a new level of brightness and shine from this undercounter model, which is ideal for luxury hotels or Michelin-starred restaurants.

Glasses will sparkle and cutlery will gleam when the Undercounter Premium 50 delivers an exceptional wash each time. This is made possible by its two cycles and total drainage function. This specialist warewasher gives perfect results even with diverse loads. As with any warewasher brought to you by Richard Jay, this model is also designed for energy efficiency.

Key features

- 6 wash cycles, 4 with partial wash water drain and 2 with total wash water drain before the rinse
- Colour-coded high tech control panel
- PLUS system with booster pump for an excellent final rinse
- Standard detergent and rinse-aid pump

03 – The Undercounter Premium 50HR

Expect a new level of brightness and shine from this undercounter model, which is ideal for any luxury hotel or restaurant.

Delivering the same industry leading washing capabilities of the Undercounter Premium 50HR, with added 'heat recovery' technology. This model's innovative 'heat recovery' system uses the heat produced by the machine to pre-heat the in-feed cold water - offering an immediate energy cost saving of around 35%.

Key features

- Heat recovery system steam condenser
- 6 wash cycles, 4 with partial wash water drain and 2 with total wash water drain before the rinse
- PLUS system with booster pump for an excellent final rinse
- Savings on water, detergent and energy consumption, thanks to the innovative rinse-system

04 – The Hood 800 Warewasher

Reduce water, energy and chemical consumption with JayWare's hooded warewashing models.

The Hood 800 model delivers maximum efficiency using minimum resources. Available model offer the latest in warewashing innovation and advanced features, including the Thermostop system; which ensures the machine's rinse cycle is stabilised at 85 degrees and flows at a constant pressure to eliminate the need to draw on fresh water during the rinsing stage.

1150hr

410H/690hr

GN 1/1 530x325

Key features

- 2 wash cycles
- Hood operating start/stop functions
- Deep-formed tank
- Pump filter
- Built-in rinse-aid pump

05 – The Warewashing Hood 140 Premium

Significantly reduce energy, water and chemical consumption with the Hood 140 Premium warewashing model.

It features the 'Plus System', which ensures the machine's rinse cycle is stabilised at 85 degrees and flows at a constant pressure. This water-conservation measure means there is no need to add fresh water during the rinsing stage and also ensures the correct dose of rinse aid in every cycle.

Key features

- Colour-coded high tech control panel
- 5 wash cycles
- Self-cleaning vertical pump
- Self-diagnostic system for users & staff
- Double skin insulated hood

1800/hr

06 – The Warewashing Hood 140 Premium HR

Significantly reduce energy, water and chemical consumption with the Hood 140 Premium HR warewashing model.

For sustainable warewashing and sparkling results, the Hood 140 Premium HR model uses the heat produced by the machine to pre-heat the in-feed cold water – offering an immediate energy cost saving of around 35%. It also features the 'Plus System', which ensures the machine's rinse cycle is stabilised at 85 degrees and flows at a constant pressure so there is no need to add fresh water during the rinsing stage.

Key features

1750/hr

410H - 1050/hr

GN 1/1 530x325

- 5 wash cycles
- Self-cleaning vertical pump
- Heat recovery system & steam condenser
- Double skin insulated hood
- Colour-coded high tech control panel with LCD screen
- User-friendly Multi Chrome Start Key

07 – The Wash & Store

Now there's no need to unload the dishwasher at your cafe or restaurant with Richard Jay's ingenious space and labour-saving 'Wash & Store' solution – an Australian first manufactured in Italy for JayWare.

This ultra-sophisticated warewasher looks the part, does the job and reduces your energy bills and consumption of resources. What's more, it serves as a fabulous showcase for your statement crockery, silverware and fine china.

Key features

- Colour-coded high tech control panel
- Thermo-resistant independent glass doors
- 9 wash programs and 8 wash and rinse arms for a superior clean
- Dedicated 'soft start wash system' to prevent any sudden upsets

FLEXIBLE SOLUTIONS & NATIONWIDE SUPPORT

Richard Jay understands that all organisations, facilities and businesses have different budgeting and operational requirements that must be kept in balance and running smoothly.

To find the best payment and maintenance solution, our experts get to know your business and what will work best for you. We offer a range of flexible payment options with built-in support through our After Sales Department. These plans encompass machinery & equipment, servicing, spare parts and accessories.

After Sales Department

The Richard Jay National Service Centre is your first port of call for all breakdown servicing and spare parts.

We are the only truly national provider in the industry with a team of service people across Australia who can assist with your servicing requirements to maintain optimum performance and extend the life of your machinery.

Our experienced co-ordinators will arrange for prompt delivery and visits from our expert warewashing technicians nationally.

JayWay

JayWay is our all-inclusive subscription service that covers all your laundry and warewashing requirements. Over the term of the JayWay contract, you pay just the one monthly fee calculated per day and whichever itemised option is best suited to your facility.

CapitalPlus

Capital Plus service is a cost-effective agreement that is also tax deductible. You receive access to brand-new machinery as well as breakdown servicing for one regular monthly payment, for a fixed term.
